

# I Firmenich Context

Firmenich's Cedarwood Virginia oil is obtained from the wood of *Juniperus Virginiana*.

This tree grows wild and in abundance in several Southeastern states in the United States, including Alabama, Arkansas and Missouri.

The wood of the Cedar trunk is extremely pleasant and also serves as a strong insect repellent.

It is primarily used by closet manufacturers.

The wood used for distillation (sawdust and small parts) is this industry's byproduct.

The closet industry oversees a careful and controlled use of the raw material, and its logging is fully sustainable.

Firmenich's partner in Alabama, U.S., distillates our oils.

# I Technology

To obtain the essential oil, Cedarwood is processed through Steam Distillation.

The essential oil is then combined to a perfectly monitored Rectification process resulting in a unique woody profile...

# I Reported Benefits

Thanks to its sedating ability, Cedarwood essential oil benefits the skin by relieving itching.

It also has a calming and soothing effect on the mind.

The essential oil is used in vapor therapy to treat arthritis and rheumatism.

Woody - Ambery

*Juniperus virginiana*

## Portfolio

**CEDARWOOD SUPER RECT  
922051**

Pure & Natural.

The rectification process concentrates the noble woody and slightly ambery notes of Cedarwood.
