

AROMATIC

ESSENTIAL OIL

NATURAL: 100 %

Mentha arvensis

CAS NUMBER 0068917-18-0

REACH NUMBER

FEMA NUMBER 4219

OLFACTIVE DESCRIPTION

A pure and delightful piperita profile, this mint is crafted from proprietary and unique ingredients. An essence designed around a core of non-traditional natural mints laced with hay and subtle floral accents.

PERFUMERY USAGE

This cost-effective treasure will inspire unique formulations, specially in Home care and Body care applications.

SOURCING

Originally grown mainly in the north-western states of Oregon and Washington, American Peppermints are now also grown in Idaho, Indiana and Michigan. The American mint earns a high reputation for the quality of its Peppermints, usually considered as far superior to Indian qualities. Mint is grown in large irrigated fields, mechanically harvested and distilled in the harvesting containers. This very efficient supply chain has allowed American Mints to remain competitive although production has gradually decreased over the past ten years. With its own mint unit in Oregon (ESSEX), Firmenich is at the heart of mint fields, in a constant process of selecting new hybrids to enrich its palette, a unique program in the world. We also focus on growing mint and producing essential oils with processes that respect the environment, such as energy efficient distillation and water-saving irrigation techniques specific to the landscape of the particular farms.
