

AROMATIC

ESSENTIAL OIL

NATURAL: 100 %

*Mentha piperita*

**CAS NUMBER** 0008006-90-4  
**REACH NUMBER** 01-2119974601-36  
**FEMA NUMBER** 2848

### OLFACTIVE DESCRIPTION

One of our most recent creations, this exceptional variety was first a success in tea applications. Beaming with unique and intense mint facets, this slightly herbal essential oil, blends camphor notes with fruity aspects and coconut hints elegantly.

● Firmenich Main Sourcing Country  
UNITED STATES OF AMERICA

### PERFUMERY USAGE

MINT PIPERITA EO BOULDER SX will bring uniqueness and mint signature in many Home care and Body care applications.

### SOURCING

Originally grown mainly in the north-western states of Oregon and Washington, American Peppermints are now also grown in Idaho, Indiana and Michigan. The American mint earns a high reputation for the quality of its Peppermints, usually considered as far superior to Indian qualities. Mint is grown in large irrigated fields, mechanically harvested and distilled in the harvesting containers. This very efficient supply chain has allowed American Mints to remain competitive although production has gradually decreased over the past ten years. With its own mint unit in Oregon (ESSEX), Firmenich is at the heart of mint fields, in a constant process of selecting new hybrids to enrich its palette, a unique program in the world. We also focus on growing mint and producing essential oils with processes that respect the environment, such as energy efficient distillation and water-saving irrigation techniques specific to the landscape of the particular farms.
